BASIC-ABSTRACT:

Paper (natural or coated) or synthetic resin foils (PVC, polyamides, etc) for use as labels afixed on glass, wood, plastics, cardboard, etc., by means of an aq. or dispersion base glue, are provided with a hydrophilic coating of a carboxyl-contg. polymer (e.g. polymers of (meth)acrylic acid, maleic acid, crotonic acid, or their salts or esters, or copolymers thereof). The glue is uniformly spread, and it dries rapidly as the coating is permeable to water vapour.
